

HOW TO TRADE WITH CROPTODEX?

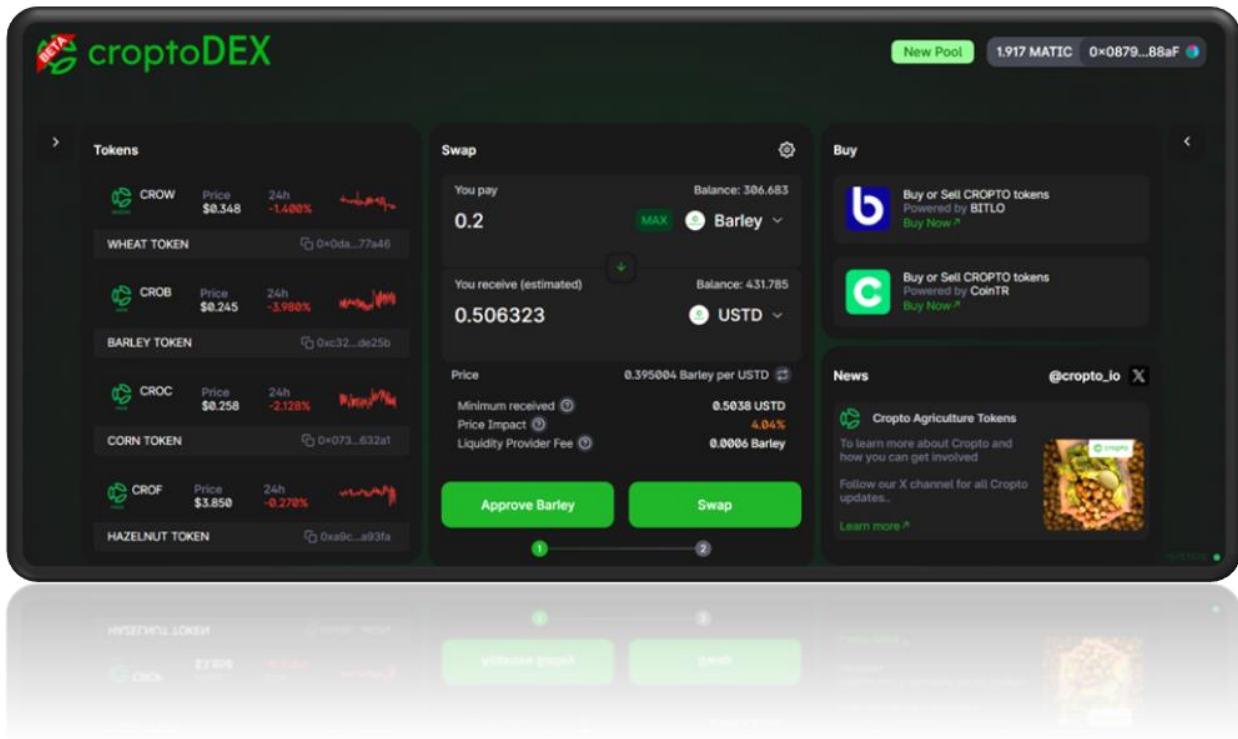

CroptoDEX is a Decentralized Crypto Asset Platform for Cropto Agriculture Tokens. Cropto is a family of Agriculture Tokens consisting of 20 Agricultural products. Details can be viewed in the Whitepaper on the website <https://www.cropto.io/> . CroptoDEX platform is a trading platform consisting of Cropto Agriculture Tokens - USDT trading pairs.

You can trade Cropto Tokens with CroptoDEX anytime. You can see how to trade with **CroptoDEX** below.

- 1) Send your wallet address to support@cropto.io to be able to receive tokens in Polygon Amoy Testnet.
- 2) Connect your Wallet to **CroptoDex** with Metamask selecting Polygon Amoy Testnet.
- 3) After connecting successfully you can easily swap your Cropto Tokens with USDT in the swap screen. In order to swap you need to:
 - a) Provide the amount of the input that you are willing to pay.
 - b) The exact output of the token that you will receive from the swap will be seen in the output part of the swap screen
- 4) After you approve the estimated output, then you can execute the trade with the Swap button.

EXECUTE THE SWAP WITH THE PAIR YOU SELECT

The World's first Agriculture-based and Ethereum-based Decentralized Crypto Exchange Marketplace - CroptoDEX Beta Version is now live!! Wheat, Barley, Corn, Hazelnut, Olive, Cotton, Soybean, Paddy Rice, Lentil and 20 Agricultural Products in total are now exchangeable like the ancient times of Humanity. You can see the smart contract addresses of 20 different Cropto Tokens for 20 different Agricultural products in the following table.
